

CAPS™ Data Services

Research, Analyze, Select

Customize your Component Data needs:

- Perform data scrubbing across the enterprise.
- Verify compliance across all product lines to provide reports to compliance agencies.
- Ensure your BOMs contain only accurate and updated parts.
- Replacement and alternate source identification. Identify possible component alternatives from our database of over 150 million components.

Custom Services Include:

- Specialized BOM cleansing
- Cross-enterprise environmental compliance reports
- Other data services for electronic components data.

Lifecycle Monitoring and Reporting

Receive a customized report on your parts to identify lifecycle status and avoid last-minute design changes.

Navigate the world's supply of electronic components and component data on over 160 million electronic components!!!

About Us

PartMiner WorldWide Inc. provides electronic component procurement services to thousands of electronic manufacturing companies around the world. PartMiner collects and interprets worldwide market intelligence and component data from manufacturers, distributors, and other supply sources. PartMiner's CAPS database is the leading source of technical information in the industry delivering complete data sets on more than 150 million individual electronic components from more than 1800 active manufacturers.

PartMiner is headquartered in Centennial, Colorado, USA and has US offices in New York, California, Florida and Massachusetts. International locations include Brazil, China (Shenzhen, Shanghai, Suzhou, Beijing, and Hong Kong), France, Germany, India, Israel, Mexico, Singapore, Sweden, and the United Kingdom.
